2) Payment of fees online

It is done via various methods including: Master card and Visa. Following this operation, the applicant receives a notification of the proof of payment by email or SMS a few minutes later. If you do not receive it in your email, please check your spam. If you have not received anything in your spam, go to the page for managing your visa applications to download your proof of payment. This document is illustrated as follows:

3) Processing the request

It is carried out by the Diplomatic Mission or the Consular Post that is legally competent or geographically close. For applicants from areas far from the Posts and where there is no coverage, an online visa issuance authorization with a QR Code closes this phase. For those residing in the city where the competent Post is located, an automatically generated notification is sent to them by email or SMS to make an appointment for the biometric enrollment formality. Either procedure takes place within 72 hours after pre-enrollment. This period is 24 hours in the context of an express procedure. The document containing the QR Code is illustrated as follows:

**Pré-enrôlement approuvé

4) Affixing the visa

It is carried out either at the Border Post of Entry for holders of authorization 6 for issuing visas online, or at the competent Diplomatic or Consular Post for applicants who have completed their biometric enrollment there. I would like to point out here, for the benefit of the members of the Diplomatic Corps present here, that the visa procedure that I have just outlined, with regard to the applicant for an entry visa to the national territory, is the same for courtesy and diplomatic visas. It should be noted, for applications for diplomatic, service and courtesy visas, that the procedure consists of either submitting the physical files to the nearest Diplomatic Mission or Consular Post, or sending them via the email address visas@cmaeociyaounde2024.cm for processing by the dedicated teams
